The new waste separation system components:

VS ENVI® Water for greater convenience and sustainability!

Pordenone, 17/10/2023 – Vauth-Sagel is one of the leading providers of integrated waste collection systems. The extensive VS ENVI® product range offers solutions for every household, from large families down to individual persons. New to the range are VS ENVI® Water waste systems, which can be effortlessly installed next to Quooker water reservoirs in the cabinet under the sink.

Water treatment systems are a trend today. Quooker, the tap that can do everything, is the leading example of this. But kitchens offer limited space. Many wonder where they can put their waste collection system, which is typically located beneath the sink. VAUTH-SAGEL has now developed the ideal solution. VS ENVI® Water is optimally suited for installation in combination with the Quooker CUBE cold water reservoir and the PRO3 boiling water reservoir. A special metal frame joins the established VS ENVI® Space/Pro waste sorting systems from Vauth-Sagel, allowing the water reservoir to be integrated.

The perfectly coordinated design ensures that all the necessary components can be compactly stored in the cabinet below the sink. The variant for 600 mm cabinets was introduced by Vauth-Sagel at interzum already. Now the system has also been adapted for 800 mm and 1000 mm cabinets.

All systems require a unit depth of 470 millimetres, ensuring sufficient space to organise the entire hose and cable management so that it is compact and tidy. A Quooker Cube cold water and a Pro3 boiling water storage tank can be set up to the right or left of the waste bins.

Many combinations are possible: the VS ENVI® Water in the 600-mm width can be combined with all variants of the VS ENVI® Space and the VS ENVI® Space Pro C400. Likewise, the VS ENVI® Water in the 800-mm width can be combined with all variants of the VS ENVI® Space and the VS ENVI® Space Pro C600. If the VS ENVI® Water is to be installed in the larger 1000-mm unit, it can be

MEDIA INFORMATION

combined with all variants of the VS ENVI® Space and the entire scope of the VS ENVI® Space Pro C800.

The water tank remains safely in its place when the waste container is pulled out with the unit front.

Vauth-Sagel will present yet another new product at SICAM: for the Quooker Combi and Combi + 7-litre water reservoir, which is 30 mm wider than the 3-litre variant, a special width-reducing waste system has been developed, which is available for a 600 mm cabinet. All VS ENVI® Water modules are also suitable for use with other water treatment modules with identical dimensions. Vauth-Sagel's retail partner Naber sells the products under the designation Cox® Base Q.

VS ENVI® Water systems are quick and easy to install. Extension hoses can be optionally used to set up and connect the Quooker system in front of the unit. VS ENVI® Water is attached to the side wall and underbody so that it is stable and safe. Like all VS ENVI® Space/Pro systems, this variant has a metal cover plate and is equipped with smooth, durable sliding technology. With VS ENVI® Water, Vauth-Sagel offers a clever solution for more room in sink base units.

All systems are now available for order.

VAUTH-SAGEL:

Contemporary, innovative storage solutions. This has been the core business of Vauth-Sagel for over 60 years. When it comes to all of its storage solutions, the owner-operated family company focuses on people's desire for as much convenience as possible. The development, production and sales divisions are guided by this desire – every day. The company transferred its core expertise in the kitchen and furniture industry to modern living components long ago. And this motivates its more than 850 employees to manufacture over 85 million products with the "Made in Germany" quality hallmark every year. Alongside many years of expertise in a wide range of materials, other characteristics ensure that Vauth-Sagel customers worldwide are a decisive step ahead: "Creating high-quality system solutions for living spaces. For all people" – this promise is based on pioneering ideas for product design and features. This is Vauth-Sagel!
