There's always room somewhere

Tall cabinet pull-outs: Systematic organisation!

Erkeln, 9/5/2023 – **As one of the most important rooms in the home, the kitchen should be not only functional, but also aesthetically appealing. That is exactly why Vauth-Sagel has developed a range of solutions that cater to the current trends in kitchen design, ensuring they fulfil all the requirements of modern kitchens and utility rooms. The new VS SUB® Larder and VS Larder® Flex modules, in combination with the tried-and-tested VS TAL® Larder tall cabinet pull-out, form a modular system for more individuality and customised solutions in both tall and base units. The result? More overview, convenience, flexibility and organisation for stylish kitchen and utility areas.**

“We love modular systems that combine the very best individual components for seamless functionality,” enthuses CEO Claus Sagel. “This is why we have paid special attention to where the components will be used, whether that’s next to the refrigerator, the washing machine or the cooker. Everything has been factored in to perfection.”

The VS SUB® Larder is the base cabinet pull-out model and so the lower version of the tried-and-tested VS TAL® Larder. And what’s extra practical is that the shelves of the VS SUB® Larder are compatible with those of the VS TAL® Larder.

The bottom level is always a shelf element, and from the second level up, it can be equipped with modules from the VS Larder® Flex modular system and accessed from both sides to fulfil a range of functions. Its sleek dimensions allow it to fit into any kitchen unit, and it is even available in various sizes and colours.

The tall cabinet pull-out creates additional storage space for groceries, kitchen utensils, or even laundry and cleaning supplies in the utility room thanks to its ideal dimensions and features. In fact, this is where the VS Larder®Flex elements really come into their own, offering diverse possibilities for maximizing space utilization, organization, and flexibility in an individual design. Another real highlight is that the shelves in both the VS TAL® Larder and VS SUB® Larder have identical dimensions. This means both can be equipped with the same shelf variations and with baskets and

shelves from all design collections: Classic, Saphir, Premea, Essentio and Planero®.

The star of the show for both pull-out systems is the VS Larder® Flex modular system. Continually refined by the Vauth-Sagel product developers, this system comprises various modular elements that can be flexibly combined with each other for design possibilities that can be adjusted and utilised for (almost) every need. What's more, it is even possible to add elements or replace them at a later stage. Notable examples include:

- **VS Larder® Flex Clip:** This allows the VS Larder Flex inserts to be attached at the desired height without the need for tools.
- **VS Larder® Flex Hook:** The hook rack offers organised hanging storage for cloths, towels, cooking utensils, or even brushes and shovels.
- **VS Larder® Flex Roll:** This holder ensures that kitchen rolls are stored invisibly yet always within reach.
- **VS ADD® Boxes:** The **VS Larder® Flex** modules can be complemented by the flexible box system.

All components of the modular system can be individually combined to suit the respective area of use. Alternatively, the option is also available to select pre-configured theme sets. With the **VS Larder®** modular system, the interior of the cabinet is always organised and easily accessible.

VAUTH-SAGEL:
