Award-winning and proven innovation

VS TOP® Down makes life easier!

Erkeln, 09/05/2023 – Almost nothing is worse than having to look for something in a wall unit on tiptoe, and realising that the objects you are looking for are at the back. But with VS TOP® Down, this situation is a thing of the past! This revolutionary – and now established – innovation has received a renowned design award for its outstanding properties. When it comes to ergonomically difficult-to-access wall units, VS TOP® Down sets new standards. It's never been this easy to get what you want!

A simple pull on a handle that has been invisibly integrated is enough – and the elegant sheet steel shelf gently glides out of the unit to provide you with convenient access to the contents. This is a universal design experience. VS TOP® Down is the perfect solution for anyone who never wants to moan about their height again. Without having to stand on tiptoe or use a ladder, you can easily grasp the contents of your wall unit. The unique drop-down fitting sets standards in ergonomic storage space optimization and ensures that the space beneath the shelf remains usable. The best part is that VS TOP® Down can easily be retrofitted and is suitable for both wall units with hinges and those with gas strut fittings. The spring force can be manually set in five stages to ensure a constantly moderated drop-down movement. VS TOP® Down boosts functionality in the kitchen and does its part to optimise urban living spaces everywhere. This truly pioneering innovation will boost your kitchen to the next level!

VS TOP® Down has received the Golden Award – Best of the Best in the kitchen furniture and equipment category from the Kitchen Innovation Award. This award honours the system's outstanding functionality, innovation, product benefits, design and ergonomics.

The fitting is available in two different widths – 600mm and 900mm – and with one or two shelves. Two colour variants are available: silver and lava. In the U.S., there is also a special version in the new LIGANO design.

As a processor, you can also purchase single fitting sets and use a base of your choice. This offers an infinite number of options for customisation. The manual spring force
