Housekeeping with VAUTH-SAGEL = Tidiness + convenience

VS WASH®: Organising the laundry is as easy as pie!

Erkeln, 09/05/2023 – When it comes to kitchens, the expertise of VAUTH-SAGEL has been well-known and proven for decades. With their transfer of this expertise to other areas like housekeeping, VAUTH-SAGEL have demonstrated their creativity and innovative power for years. After all, collecting and transporting dirty laundry, for example, is a very special challenge in every household. Irrespective of whether the washing machine is in the basement, the utility room, the kitchen or the bathroom. It is important to find a suitable place with enough space for laundry to ensure convenient living space design. The components of the VS WASH® series extend the portfolio in the housekeeping area and are the elegant solution for sorting, storing and transporting dirty laundry – tidily and invisibly.

VAUTH-SAGEL developed the VS WASH® series in order to optimally use the existing space and simplify the workflows in the kitchen and utility room. The system satisfies everyday requirements, as it is well-designed and practical. The laundry hampers are available in a unique variety of types and now come in heights of 550, 460, 426 and 326 cm. Three colour variants are available: Basic colour lava with a lava-coloured carrying handle and white with a light grey carrying handle, plus grey hampers with a grey carrying handle. The special feature: they have perforations that ensure optimal air circulation. Inside the hamper, the perforations are rounded to protect the laundry. All the hampers in the VS WASH® series are equipped with carrying handles that simplify the transport, even if two laundry hampers have to be transported at the same time. The drop concealed behind the front can be perfectly integrated into any living space. Technically and visually, all VS WASH® systems is based on the proven waste separation systems of the VS ENVI Space range.
